Study Material Questions

Ques 1. What are the different default tabs available in SAP Cloud Integration.

- Monitor
- Design
- Transport
- Discover

Ques2. How many development environments are there in SAP BTP?

- 2
- 3
- 4
- 5

Ques3. Which of the following is not a part of Transformation in Web UI?

- Encoder
- Decoder
- Splitter
- Converter

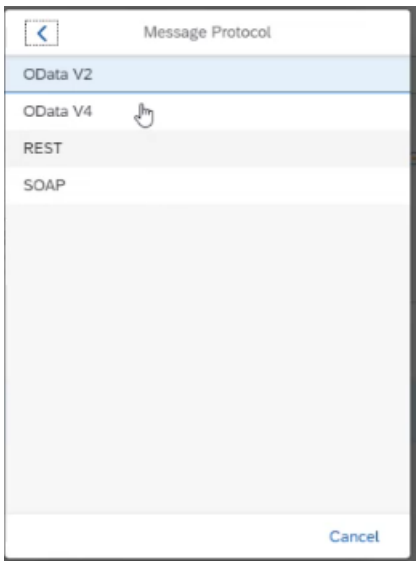

Ques4. What are the valid converter types available in sap cpi iflow

- Xml to Json
- Json to xml
- Xml to csv
- Xml to xsd

Ques5. **HTTP** Session **Reuse** Choose the correct options:

- None: Session handling is switched off.
- On Exchange: Each exchange corresponds to a single session (use this option for stateful services).
- On **Integration Flow:** Only one session will be used across the whole **integration flow** (only use this option for stateless services).

Ques6. SuccessFactors Receiver Adapter message protocol valid options.

Ques7. Which one is not a tab section inside the package?

- Overview
- Design
- Artifact
- Documents

Ques8. Which of the following are the types of splitters?

- General Splitter
- PKCS#7 Splitter
- Tar Splitter
- Zip Splitter
- Iterating Splitter
- EDI splitter

Ques9. Which of the following will appear on web Ui after creating an Artifact? (By default)

- Start Message
- Start Event
- End Message
- End Event

Ques10. Which of the following will come by default will adding Local Integration Process?

- Start Message
- Start Event
- End Message
- End Event

Ques 11. What are the different options in SOAP Receiver Adapter authentication?

- None
- Basic
- Plain User/Password
- Client Certificate

Ques 12. Which options will differ between trail account and paid account?

- Home
- Discover
- Design
- Inspect

Ques 13. What are the operation details available in SuccessFactors?

- Create
- Delete
- Update
- Query
- Read
- Upsert

Ques14. What are the authentication options available in SFTP Adaptor while connecting from Sender to Start Message?

- Public Key
- Username / Password
- Dual
- Dynamic

Ques 15. What best describes the relation between a project and iFlow

- 1: N
- N:1
- N: N
- 1:1

Ques 16. Which of the following are the benefits of cloud foundry

- Language independent
- Open source
- Admin Separation
- Standard Command Line Interface
- All of the above

Ques 17. What type of platform is SAP CPI considered to be?

- Platform as a Service (PaaS)
- Software as a Service (SaaS)
- Infrastructure as a Service (IaaS)
- Integration Platform as a Service (iPaaS)

Ques 18. Which of the following is NOT a component of SAP CPI?

- Integration Flow Designer
- Message Monitoring
- Data Warehouse
- Security Artifacts

Ques 19. What does the Inspect icon in SAP CPI allow you to do?

- Create new iFlows
- Monitor and debug iFlows
- Delete iFlows
- Export iFlows

Ques 20. Which of the following is NOT a supported adapter type in SAP CPI?

- SFTP
- JDBC
- MQT

- USB

Ques 21. Which of the following is NOT a valid message processing step in SAP CPI?

- Content Enricher
- Message Router
- Data Splitter
- Data Aggregator

Ques 22. Which is the default Role Collection provided for Integration Suite?

- Integration_Provider
- Integration_Developer
- PI_Integration_Developer
- Integration_Provisioner_Auto

Ques 23. Which of the following is true about the Message Mapping step in SAP CPI?

- It only supports XML to XML transformations
- It can handle multiple input and output message formats
- It does not support custom functions
- It is used for message routing

Ques 24. In SAP BTP Cloud Integration, which of the following adapters is exclusively for receiver connectivity but not for sender connectivity?

- SFTP
- SOAP
- Mail
- LDAP

Ques 25. What are the versions available in OData?

- OData V1
- OData V2
- OData V3
- OData V4

Ques 26. In which tab scripting languages are available?

- Security

- Persistence
- Transformation
- Routing

Ques 27. What are the data store options available?

- Write
- Select
- Get
- Delete
- Update
- Upsert

Ques 27. How many types of splitters are there?

- 4
- 5
- 6
- 7
- 8

Ques28. In SAP CPI, what component is used for message transformation?

- Integration Flow
- Content Modifier
- Message Mapping
- Adapter Framework

Ques29. What does the term "message persistence" refer to in SAP CPI?

- Storing messages in a persistent storage for future use
- Retaining messages temporarily in memory
- Logging error messages only
- Encrypting messages during transmission

Ques 30. Which of the following is NOT a feature of SAP CPI?

- Data transformation
- Integration monitoring
- On-premise deployment
- Pre-packaged integration content

Ques 31. Can there be multiple Sender connected to a single Start Message?

- True
- False

Ques 32. Which of the following service components will not come under IaaS?

- Applications
- Operating Systems
- Virtualization
- Data
- Storage
- Networking

Ques 33. Which of the following service models will be used for trail purpose?

- IaaS
- PaaS
- SaaS
- IPaaS

Ques 34. For how many days will the trail account be active?

- 30 Days
- 60 Days
- 75 Days
- 90 Days

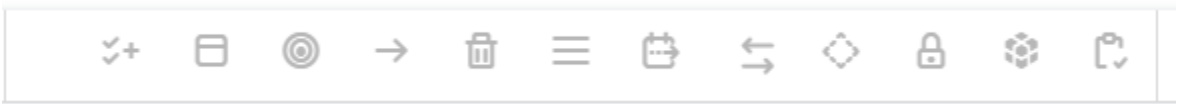

Ques 35. What type of platform is SAP BTP considered to be?

- Platform as a Service (PaaS)
- Software as a Service (SaaS)
- Infrastructure as a Service (IaaS)
- Integration Platform as a Service (iPaaS)

Ques 36. Which of the following is the on boarding process to SAP CI ?

- Tenant->License->Development->Deploy&Test->Transport->Monitor
- License->Tenant->Development->Deploy&Test->Monitor->Transport
- License->Tenant->Development->Deploy&Test->Transport->Monitor

Ques 37. Guess the names of the following notations

Ques 38. Which of the following events are not there?

- Error Start Event
- Error End Event
- Escalation Start Event
- Escalation End Event

Ques 39. Which of the following are the essential properties of RFC Destination?

- jco.client.ashost
- jco.client.client
- jco.client.lang
- jco.client.sysnr

Ques 40. What are the content type for Open Connector?

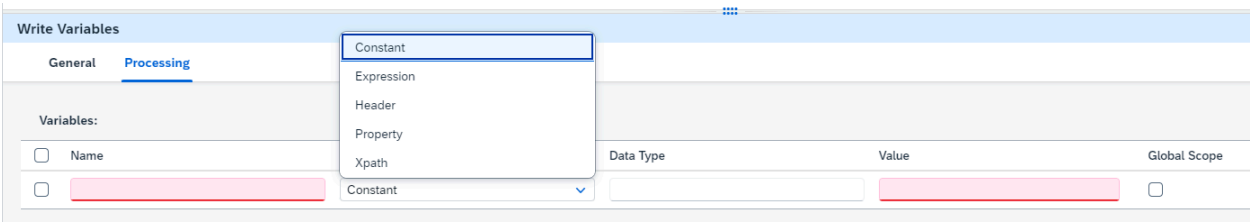

- ATOM
- JSON
- XML
- Text

Ques41. **Write Variable** step allows you to create different types of variables.

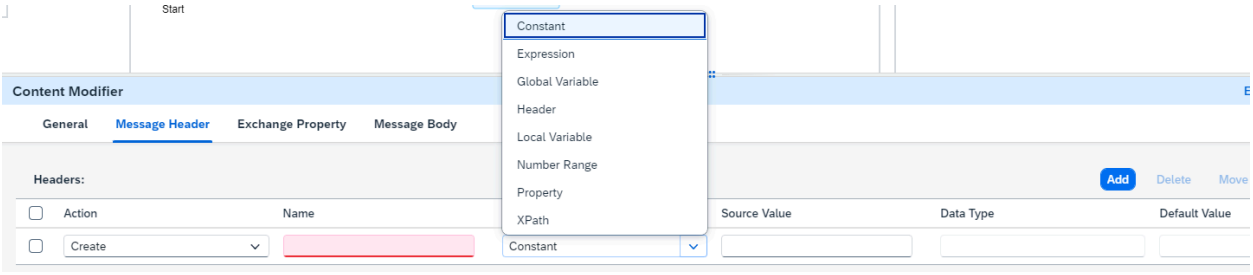

These include:

1. **Constant**: A fixed value that does not change.
2. **Header**: Information from the message header.
3. **Property**: Custom properties that can be used within the integration flow.
4. **Expression**
5. **xpath**

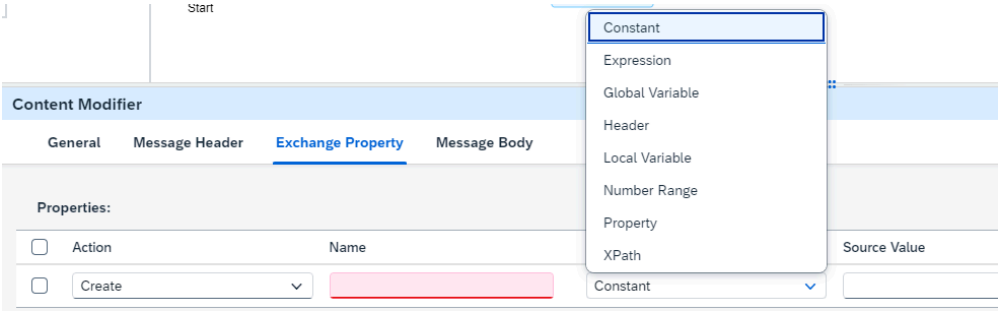

Ques42. Study Abt variables, different types
Local variables & Global variables, Types are as below: 5types

Ques43. Different types of **Headers** : 8 types
Constant,XPath,Expression,Header,Property,Number Range, Local and Global variable

Same for **exchange property** also : 8 types

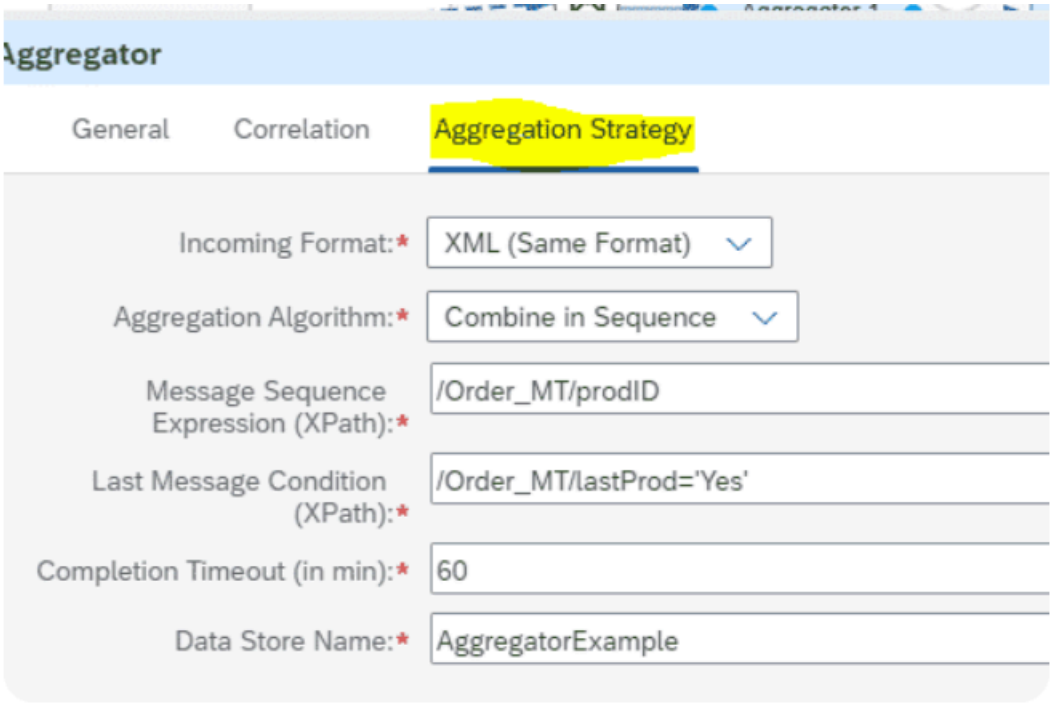

Ques44. Types of encryptions : PGP , PKCS7#CMS

Ques45. Types of prepackaged content : Editable, Configure only

Ques46. Types of encoder and decoder, schema - Base64 , GZip, Zip ,MIME

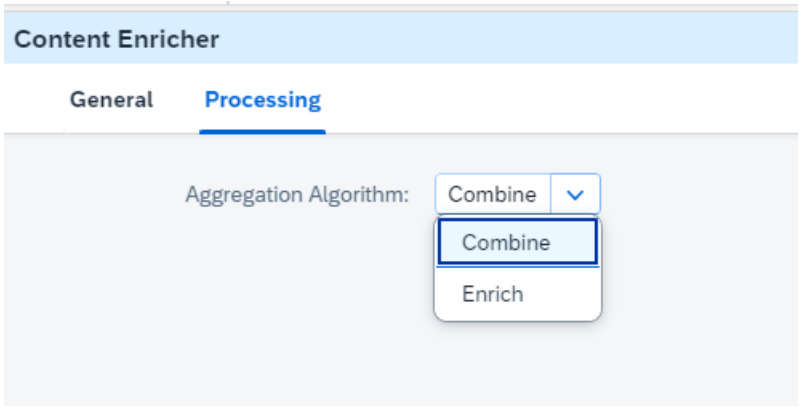

Ques 47.1 What are the Aggregator strategies available? -- combine, combine in sequence

Ques 47.2 What are two kinds of Aggregation Algorithm available.

1. **Combine** : This will combine the incoming messages without any guarantee on the order of the messages.
2. **Combine In Sequence** : This will combine the incoming messages in exact order.

Ques 48. Content enricher - types of enricher, types of formats?

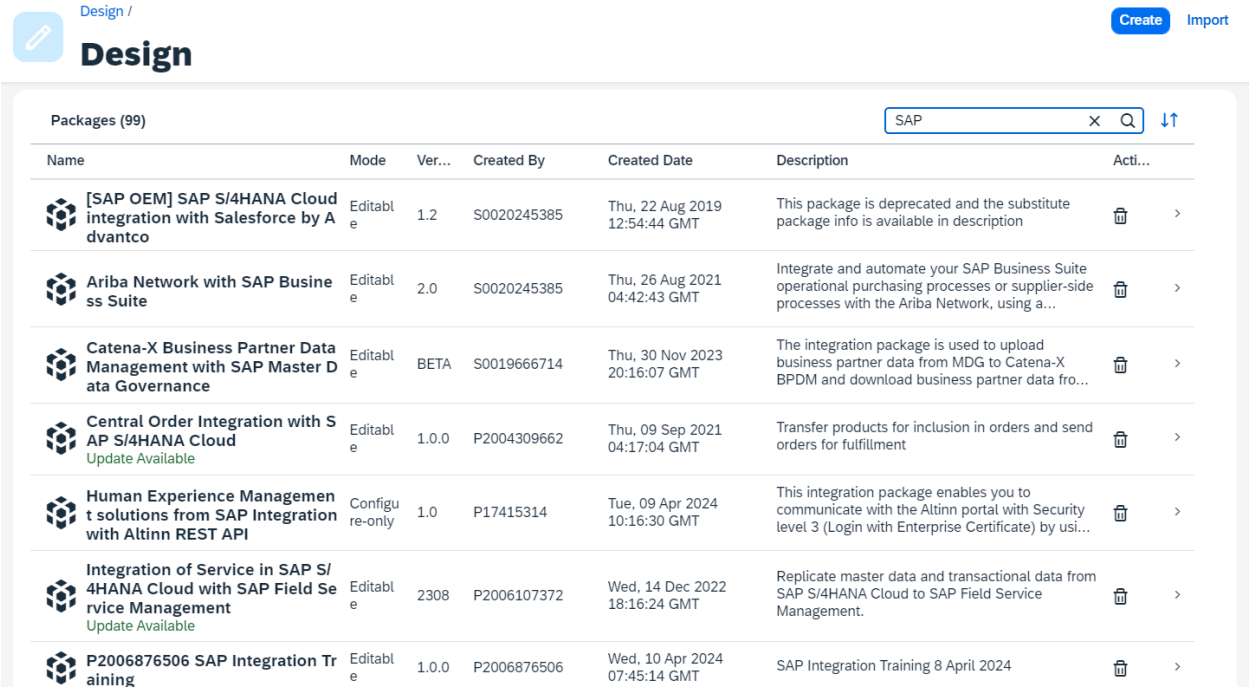

Ques 49. What is the default role for developer? – integration developer (PI_)

Q50.Different tabs on integration suite
Home,Discover,Design,Monitor,Inspect,Settings

Q51. How will you get an update for pre packaged content, where will notification come.

-Design tab, update available.

Q52.error end event (close the event) vs escalation end event (send the escalation msg)
The Escalation Event does not abort the integration flow processing as a whole but only throws the Escalation Event .
In case of a synchronous exchange pattern, the process raises an exception and the message will be marked as
Escalated. In case of an asynchronous exchange pattern no exception will be raised and the message status will be Escalated.

Q53.types of adapters- receiver side & sender side
Sender Side - 23
Receiver Side - 39

54. Types of log configurations : None, info, error, debug, trace

55.Know the query parameters of odata adapter : skip, top
3 standard OData query parameters “skip”, “top” and “filter”,sorting. We can use all these in query combinations.
---> for reference : OData | SAP Help Portal

56. Which of the below Security Material can be created

- Secure Parameter
- User Credentials
- OAuth2 Authorization Code
- Client Credentials

57. What are the different Status that you can set under Monitor Message Processing
- Completed
- Retry
- Abandoned
- Re-Trigger

58. Which of the following protocols is commonly used in SAP Cloud Integration for API calls?

- FTP
- HTTP
- SMTP
- SNMP

59. What is SAP Cloud Integration primarily used for?

- Data analysis
- Application development
- Connecting different systems and applications
- User management

60. What type of authentication is commonly used in SAP Cloud Integration for REST APIs?

- Basic Authentication
- Digest Authentication
- OAuth 2.0
- All of the above

61. This is a standard RFC destination with the following essential properties:
- jco.client.ashost (URL from the cloud connector)
- jco.client.client (ABAP system client)
- jco.client.lang (language of the connection)
- jco.client.sysnr (system number).
